(b) whether any State has demanded for amending loan-grant ratio; and

(c) if so, the demand of State Governments in this regard and the decision expected to be taken thereon?

THE MINISTER OF FINANCE (SHRI P. CHIDAMBARAM): (a) to (c) Central Assistance flowed to States on a Schematic basis until the year 1968. From 1969 the Gadgil-Mukherjee formula, was approved by the National Development Council, wherein Central assistance would flow to the States as block assistance without being tied to any specific sector in the loan grant ratio of 70:30 for general category States and 10:90 for Special Category States. This assistance popularly came to be known as Normal Central Assistance. Over the years, however. Gadgil Formula underwent several changes and several components of Schematic/ Programme-related assistance were introduced. However, all assistance, other than programme-related assistance, including Additional Central Assistance, Special Plan Assistance, Special Central Assistance and Externally Aided Projects flowed in the loan grant ratio of 70:30 for General Category States and 10:90 for the Sepecial Category States in the Normal Central Assistance pattern.

Rajasthan raised the demand in the last National Development Council meeting in June 2005, for enhancing the grant component of Central Assistance. However, there is no proposal under the consideration of Planning Commission for the modification in the loan grant pattern for the allocation of Normal Central Assistance.
